The I/O Performance is very poor. Why ?

What is New in Version 3.2

The Speedgain Utility Information shows the reason for the poor I/O performance. There is a rebalance activity on two tablespaces

The screenshot displays the 'Utility Information for database DB0222' window. The left sidebar shows a tree view of system components, with 'DB0222' selected under 'Databases'. The main area is divided into two sections: 'Current Snapshot' and 'Last Snapshots'.
